### PROFILE

A methodological and client-focused software developer with a passion to enhance software products through automation. With a background in IT and ability to work both independently and collaboratively, my technical skills include Python, Java, Javascript frameworks, and more. I cherish diversity due to my background. As a result, I aspire to thrive in a culture of continuous learning, staying ahead in the fast-evolving world of data and automation.

### EXPERIENCE

**Software Developer, Pinja Oy | 9.2023 - 12.2023**

Built a resource allocation tool with Vue.js and Bryntum Gantt chart, enhancing user experience by 5% through customized filter component.

**Future Analyst, Demola Global Oy | 10.2023 - 12.2023**

Co-creation within the Metaverse, created interactive demo using Augmented Reality platform, studio.gometa.io aiming to tackle issues encountered in collaborative spaces within the Metaverse.
